

Buugang Bila

Where it all started...

This enclosure is part of a breeding program for highly threatened frost. Quarantine conditions are viat to prevent disease killing these annus. Biseases such as the chyrid fungus are readily speed on these and hands. Once the annuals within this enclosure have bred and established a healthy copulation they will be netasad in the then rathur al environment. Your assistance in keeping the forgs free of disease is critical. PLEASE KEEP OUT OF THE ENCLOSURE. THIS AREA IS UNDER CAMERAS SURVELLANCE. For further ensuings contact the Environmental of disease (name and exercise).
